Roads Water and Sewer Report

Roads: No issues with the roads were reported. I cleaned out the drain inlet at the bottom of Juniper Street. The valve at the bottom of Cedar Street that was leaking is off until repairs are made. I am waiting for a return call from Daryl Higginbotham to schedule that repair.

Water: Samples have been tested as required. Red and yellow flags were removed. We are seeing adequate water supply.

The boil order remains in effect.

Sewer: No issues with sewer have been reported.

The quarterly report has been compiled and sent to the Regional Water Quality Control Board. Samples have been taken and tested as required.

Power meters were read and recorded.
