Roads Water and Sewer Report

Roads: I called Nv Co. to advise them of the settling of the road bed. They do not anticipate being able to make any repairs before Spring. I called Caltrans to advise them of the pot holes at the west bound off ramp. They do not foresee being able to do any repairs at this time. I spoke to Dennis Jameson and approved asphalt patching in town. Some repairs have been done. I authorized Matt Drinks to clean the road drain inlets and around the fire hydrants.

Water: The tank is full. I met with Paul Rose regarding the available tank from TDPUD. Although the tank is free, the logistics of moving the tank from Truckee to here and placing it on site are prohibitive. Paul and I agree that re-plumbing the existing tank and adding a pump are our best options at this time.

Samples have been tested as required. The boil order remains in effect.

Sewer: No issues with sewer have been reported.

I cleaned the pine needles and debris from the schoolhouse and utility building roofs as part of annual maintenance.

Power meters were read and recorded.
