Roads Water and Sewer Report

Roads: An incident with the roads was reported to Nevada County Code Violations and Nevada County Sheriff. Jess Bailey and Dennis Jamason had put a berm across Willow Street blocking access. The Sheriff came out, removed the orange cones, and stated the berm needed to be removed as it was not on Jess's property. Dave Davis and I did this.

We used the excavating contractor that was on site for water service repairs to clean up the bottom of Floriston Way where off haul from various projects had been stored.

Water: The valve at the bottom of Cedar St has been repaired. The valve to shut off Bailey's foreclosed property has been installed.

The survey to provide our schoolhouse Lot 80 property has been completed and will be filed with the County. They will also provide a topographic map for the engineer's use.

Samples have been tested as required. The boil order remains in effect.

Sewer: It was reported that the illegal sewer hook-up has been disconnected, however there are no pictures or documentation to this effect.

I have contacted several tree removal services and still am unable to get a price quote.

Power meters were read and recorded as required.
